Roseline Wanjiku Wahome

Data Scientist | Machine Learning | Python · SQL · AWS

Nairobi, Kenya · wahomeshiko@gmail.com · +254 717 640 384 · LinkedIn · GitHub · Portfolio

Professional Summary

Data Scientist with 2+ years of experience building and deploying machine learning models, automated ETL pipelines and analytics dashboards. Delivered churn prediction, NLP classification and credit-risk models that turned data into business decisions. Strong in Python, SQL and AWS, with a project management background that helps me translate stakeholder needs into measurable, production ready solutions. AWS Certified Cloud Practitioner (AWS re/Start) and ALX Data Science and Machine Learning graduate.

Technical Skills

Machine Learning: Supervised learning (classification, regression), churn and credit-risk modelling, anomaly detection, NLP (text classification, Named Entity Recognition), feature engineering, model evaluation, SHAP explainability.

Programming and Data: Python (Pandas, NumPy, Scikit-learn, SpaCy, NLTK), SQL, Streamlit

Cloud and MLOps: AWS, Docker, ETL pipeline automation, model deployment (Streamlit, Hugging Face Spaces, MLFlow), Git/GitHub.

Statistics and Analysis: Hypothesis testing, A/B testing, exploratory data analysis, timeseries and trend analysis, root cause analysis.

Visualisation and BI: Tableau, Plotly, Seaborn, Bokeh, Excel.

Professional: Stakeholder engagement, requirements gathering, project documentation, cross functional collaboration.

Work Experience

Administrative Data Scientist – Elink Agencies Ltd, Kikuyu, Kenya | May 2025 – Present

- Built Python forecasting models for monthly rental revenue, occupancy and tenant churn across multiple properties, enabling proactive planning and budgeting.

- Developed a classification model to identify high-risk late-paying tenants, prioritizing collection follow-ups and reducing rent arrears by 30%.
- Designed automated Excel → Python → SQL pipelines for ingestion, cleaning and validation of tenant, payment and maintenance data, replacing manual reporting.
- Performed exploratory and statistical analysis on arrears, vacancies and maintenance costs, uncovering revenue leakage and key cost drivers for management.

Junior Data Scientist (Internship) – Phoenix Analytics, Nairobi, Kenya | Sep 2024 – Apr 2025

- Designed and evaluated a customer churn prediction model, improving detection accuracy by 70% Raised F1-score from 0.61 (logistic regression baseline) to 0.84 (gradient boosting).” Engineered automated ETL pipelines on AWS using Python and SQL, cutting data processing time by 40%.
- Performed feature engineering and model evaluation to prepare models for production deployment. Built dashboards visualizing model outputs and business KPIs for product and analytics teams. Partnered with analysts and product teams to convert predictions into retention actions.

Junior Data Scientist (Project-Based) – ALX Africa, Remote | Apr 2023 – Aug 2024

- Processed and modelled 500K+ text records to build an NLP complaint-classification system, increasing tagging accuracy by 60%.
- Built statistical models to investigate service inefficiencies and user behavior trends. Delivered end to-end ML projects covering data wrangling, modelling, evaluation and stakeholder presentation.

Selected Projects

Customer Attrition Prediction App – Python, SQL, AWS, Streamlit | Portfolio End-to-end churn prediction solution with a deployed Streamlit app that lets users score customers and view risk drivers.

Credit Scoring Model for Loan Risk Assessment – Python, Scikit-learn, SHAP | Live demo Built and deployed a loan default risk model with SHAP explanations to make predictions transparent for risk decisions.

Anomaly Detection System – Python, Pandas, Scikit-learn, Seaborn | Portfolio Detected unusual patterns in transactional data using unsupervised methods, with visual diagnostics for investigation.

Named Entity Recognition for Customer Feedback – Python, SpaCy, NLTK | Portfolio Extracted entities from customer feedback to surface products, issues and sentiment drivers at scale.

Education and Certifications

Data Science and Machine Learning Programme – ALX Africa | 2023 – 2024

AWS Cloud Practitioner (AWS re/Start) – E-Mobilis Technologies | Sep 2024 – Dec 2024

BSc Project Planning and Management – University of Eldoret | 2013 – 2017
